

Important Safety Information

Read and understand all safety precautions and instructions before use.

- The universal Fast Hitch System is designed for Cat 1 and Cat 2-- 3 point hitches.
- Check universal Fast Hitch System before each and every use for signs of wear. Do not use if damaged or if not working properly.
- The universal Fast Hitch System is designed to be used by adults only.
- Keep children away from tractors and implements.

Instructions:

1. Determine the category of hitch you have on your tractor. Fast Hitch includes bushings to adapt category 1 hitch arms. Fast Hitch includes bushings to adapt category 1 implements to category 2.
2. Attach the main body of the fast hitch to 3 pt. arms by using bolt # 4 and nut # 14 and tighten securely.
3. Center the hitch by using bolt # 10 on top and bolt # 15 on the bottom along with jamb nut # 11 and secure. Tighten jamb nut after adjustment.
4. Use 3 each of bolt # 2 and jamb nut # 3 for each side of the hitch assembly. Tighten the bolts against the hitch arm assembly so the Fast Hitch is tight against the 3 point arms. Tighten jamb nuts.
5. Hook strap # 20 to each side of the Fast Hitch to keep lift arms together.
6. Back up your tractor to the implement and lift the 3 point arms. The spring loaded toggle should trap the pins of your implement. Make sure you have the proper pin size for the Fast Hitch so there is no play between the pins and Fast Hitch opening. Bushings are supplied if you need to adapt to Category 2. Secure top link and you are ready to use your Fast Hitch.
7. Check to make sure bolts and jamb nut are tight after 15 minutes of use. After checking the first time, complete the same process every hour.
8. To unhook your implement, hook the cable lanyard to the rod from the spring loaded toggle. Unhook your top link and lower the 3 pt. arms. Drive away from your implement slowly.

Ref. #	Qty	Part #	Description
1	1	FTF-01FH-001	Right Main Body
2	6	FTF-01FH-002	Hex Bolt 3/8-16X1-1/2"
