

The Pirtle Nursery White Dogwood tree is a beautiful early spring addition to your landscape with its delicate white flowers with dark green foliage. In the fall the leaves will develop a dynamic scarlet color. Low maintenance and color dynamic, the White Dogwood tree is a must have North American native tree.

- Includes one White Dogwood #3 (2.929 gal.) pot and detailed planting instructions.
- Dark green foliage with delicate white flowers blooming early spring, with a dynamic scarlet color in the fall.
- Low maintenance and slow growth.
- Best grown in USDA Hardiness Zones 5-8.
- Space 15-20 feet apart.
- Prefers full sun and well drained soil.
- Prune only when dormant.
- Mature height will be 15-25 feet. Mature width will be 20-25 feet.
- #3 size pot has actual size of 11.09 Liters (2.929 gal.)

Below are general planting instructions.

1. Remove tree and soil mix from plastic container.
2. Dig hole twice the width of pot and as deep.
3. Place roots, surrounded by potting soil from container, in the middle of hole. The top of potting soil should be slightly above ground level, as the plant will later settle. Be careful to not plant too deep as this will suffocate the root system.
4. Ensure the roots are not tightly compressed. Use your fingers or blunt instrument to loosen the potting soil/roots and spread gently to encourage outward growth into the surrounding earth.
5. Use soil that was removed while digging to fill hole back, but remember to only fill to top level of soil mix that is around plant.
6. Water soil, allow it to settle and add more soil if needed. Tamp lightly. (Tamp, for the majority of us who might not know, means to tap the soil with light to medium blows repeatedly.) This will help soil to settle.
7. Water plant again. Adding mulch around plant in a 1-2" layer will help retain moisture. If experiencing hot or dry weather it will be important to water plants more frequently, versus the recommended 1-2 times a week to water thoroughly.

Please review the recommended USDA Zones for your area. It is important to select plants with recommendations for your zone; otherwise, they will not be successful in your landscape due to their inability to grow in those weather conditions.
