Subject: **New 405-HE Adaptable Hose-End Sprayer**

Solo model 405-HE—the faster, easier to use, cleaner sprayer—keeps your hands chemical free.

405-HE saves time when spraying small or large areas without needing to pump the sprayer. It also saves money when using the concentrated chemical of your choice as concentrates are less expensive than pre-mixed solutions.

405-HE was designed for dispensing concentrates such as fertilizers, insecticides, pesticides, herbicides, fungicides, deer repellants, etc. The 405-HE provides best coverage using a broad, sweeping motion.

- Adapts to fit bottles of the most popular brands of chemical concentrates, or use the 32 oz. canister provided.
- No measuring, pouring or mixing.
- Quick connecting hose coupler is included.
- Anti-Siphon valve in swivel connector.
- Instant on/off trigger.
- Can be used as traditional hose-end sprayer.
- Precision metering system for accurate mixing ratio of concentrate per gallon of water.
- Liquid dispensed through top nozzle hole only: stream for high places and tough rinse jobs, shower for delicate flora, flat fan for large areas, cone pattern for shrubs
- Left-over concentrate will be undiluted so it can be poured back into its original container for later use.

Three steps with no pouring, measuring or mixing:

1

Connect sprayer to hose and adapt to fit concentrate bottle or use the 32 oz. canister provided.

2

Adjust mixing dial for desired ratio of chemical concentration per gallon of water. Adjust spray head for desired spray pattern: stream, cone, shower, or flat fan.

3

Point, squeeze, and hold trigger. For best results, spray with a sweeping motion.

Model #	405-HE
Item UPC #	720343911923
Case UPC #	20720343911934
Nozzle	Stream, Shower, Flat Fan, Cone
Cubic Feet	0.82
Case Weight	4.85 lbs
Case Size	10" x 16.5" x 8.5"
Case Qty	6
