

# TUNE-UP DIELECTRIC GREASE

Permatex® Tune-Up Dielectric Grease offers excellent lubrication for rubber, plastic and ceramic surfaces while preventing voltage leaking around electrical connections. This silicone formula prevents corrosion and improves connections. Due to high temperature properties this tolerant product avoids fusing of spark plug boots, making the installation of boots easier every time Permatex Tune-up Dielectric Grease is applied.

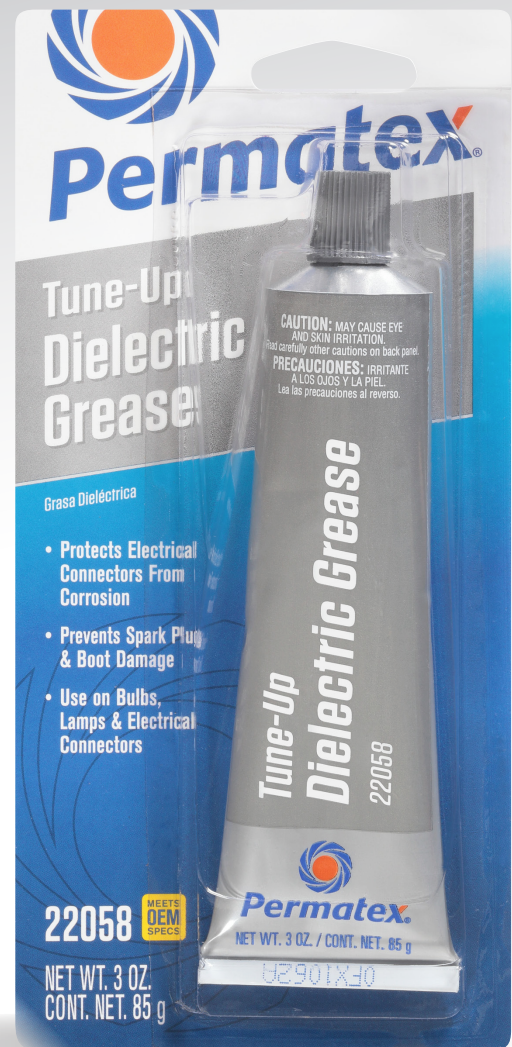

## ✓ FEATURES & BENEFITS:

- ✓ Improves Connections
- ✓ Prevents Corrosion
- ✓ Prevents Fusing of Spark Plug Boots
- ✓ High Temperature Properties
- ✓ Excellent Rubber Lubricant

**Applications:** Spark plug boots, distributor cap nipples, battery terminals, ignition coil connectors, headlamp connectors, trailer electrical connectors.

## SPECIFICATIONS:

**Product No:** 22058  
**Article No:** 7001683  
**Net Weight:** 3 OZ (85 g)  
**Case Quantity:** 6 Each

# TUNE-UP DIELECTRIC GREASE

## DIRECTIONS FOR USE

### For spark plug boots

1. Make sure ignition system is off.
2. Remove heavy grease, dirt or oil with a clean rag.
3. Coat inside of spark plug boot with a thin layer of grease.
4. Coat ceramic part of plug.
5. Snap boot onto plug. Make sure fit is tight.

### For connectors and battery terminals

1. Make sure the ignition system is off.
2. Clean surfaces with appropriate cleaner such as Brake and Parts Cleaner or Battery Cleaner.
3. Coat both parts with grease.
4. Reassemble.
