

SENTINEL® SENIOR

PRODUCT DESCRIPTION

A nutrient release formula feed for senior horses, horses with poor teeth and prematurely aging horses. Sentinel® Senior provides a highly fortified balance of nutrients and an exclusive blend of natural additives to meet the increased nutritional demands of senior horses due to less efficient digestive and metabolic systems. This unique formula is also recommended for certain horses where maintenance of digestive and metabolic health is a challenge. An extruded feed, Sentinel Senior offers a safe and natural way to provide essential nutrition that may be easily digested for optimal nutrition utilization.

FEATURES & BENEFITS

gutWise™ Nutrient Release Technology

A proprietary blend of prebiotics, probiotics, marine-sourced calcium and NutriVantage® for horses helps maintain total digestive health. These components are delivered in an exclusive extruded form to help support nutrient digestibility and availability.

Stable Digestive Environment

Probiotics and prebiotics aid in maintaining digestive health and microbial fermentation for sustained nutrient digestibility, absorption and assimilation.

Gastric Balance

Bioavailable marine-sourced calcium helps support gastric pH and health.

Optimized Nutrition

NutriVantage® for horses incorporates exclusive components that may help aid in nutrient availability and maintenance of a healthy gut environment for immune support.

Limited Starch and Sugar

A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with metabolic and digestive challenges.

'Cool' Energy

A sequential release of energy from fat and fermentable fiber provides lower starch calories to meet complex energy demands and help maintain normal digestive health.

Healthy Rate of Intake

The light and airy nature of extruded feeds may facilitate the breakdown of feed while encouraging slow consumption and more thorough chewing for maintaining digestive health.

SENTINEL® SENIOR

An extruded horse feed for maintenance of senior horses.

GUARANTEED ANALYSIS

Crude Protein, min	14.5%
Lysine, min.....	0.73%
Methionine, min	0.34%
Threonine, min.....	0.54%

continued

Nutrient Density and Release

A nutrient dense diet means more nutrition by weight, potentially delivering more of what your horse needs in less feed for ideal health and body condition.

Built-In Fiber

Fiber sources such as soybean hulls, beet pulp and alfalfa meal may help maintain healthy hind-gut fermentation while providing extra calories in a safe and natural form.

Immune Support

Antioxidant nutrients including stable vitamins and biologically available trace minerals help maintain normal health and metabolism.

Body Tissue & Integrity

Amino acids such as lysine, methionine and threonine are important for growth and maintenance of all tissues including bone, muscle, hoof and hair.

Healthy Skin and Hair Coat

Sources of Omega-3 and Omega-6 fatty acids plus protein, B-vitamins and trace mineral complexes may help promote healthy skin, hair coat and hoof condition.

Joint Support

Omega-3 fatty acids, stable vitamins and balanced minerals may help maintain joint and bone health and strength.

FEEDING DIRECTIONS

Sentinel Senior is a uniquely balanced extruded feed formulated specifically for senior horses, horses with poor teeth and prematurely aging horses. Sentinel Senior may also be fed to horses when a low starch and sugar diet is recommended for maintenance of digestive and metabolic health – consult with an equine nutritionist for a recommended diet.

The suggested feeding program is intended solely as a guide. Adjust the feeding of Sentinel Senior according to individual needs and condition of the horse. The variables of management, environment, and breed may dictate changes in the horse's dietary requirements.

Provide good-quality hay or pasture, free-choice salt and plenty of fresh water.

Horse Class	Age	Suggested Feeding Range* lb/100-lb body weight/day
Adult		
Maintenance	Mature	0.40 – 0.65
Light Exercise	Mature	0.45 – 0.70
Moderate Exercise	Mature	0.55 – 0.75
Heavy Exercise	Sentinel Active Senior is recommended	
Special Needs		
Hard-Keepers	Sentinel Active Senior is recommended	
Diets with Minimal Hay for Maintenance**	Mature	1.00 – 1.25

*Approximate feed weight to volume: 0.85 lb = 1 quart. For accuracy, weigh feed.

**Some good quality hay should be offered to help maintain good digestive function and prevent boredom.

Suggested feeding program is based on offering grass or mixed grass hays. If feeding legume hays, rich pasture, or if Sentinel Senior is fed below recommended feeding range, consult your Kent Nutrition Group sales representative or customer service for a ration recommendation.

Store in a cool dry place. This product is perishable and may degrade if not consumed in a timely manner or not stored consistent with these instructions. Do not feed this product if it appears to be unfit for animal consumption.
