EMPOWER YOUR EQUIPMENT

THE ORIGINAL ENGINEERED FUEL™

POOR ENGINE PERFORMANCE IS TYPICALLY THE RESULT OF ETHANOL AND OTHER HARMFUL CONTAMINANTS FOUND IN PUMP GAS.

Whether you're running 2-cycle or 4-cycle outdoor power equipment, the key to optimal performance and protection is fuel specifically designed for small engines. TruFuel's ethanol-free, 92+ octane formula is the pioneer in engineered fuel, combating the pump gas issues that lead to poor performance, costly repairs, and downtime.

WHY IS "ETHANOL-FREE" SO IMPORTANT FOR SMALL ENGINE USE?

REGULAR FUEL LINE

FUEL LINE EXPOSED TO ETHANOL

1. Gasoline & 2-cycle oil
2. Phase Separation
3. Ethanol, water & no oil

The first thing pumped into your engine.

PHASE SEPARATION: THE HIDDEN THREAT

Ethanol in pump gas absorbs moisture from the environment, causing water to separate and sink to the bottom of your tank- leading to rust, poor starts, and engine damage. In 2-cycle engines, it strips away critical lubrication that a fuel treatment can't restore. And it happens fast: pump gas can become ineffective in as little as 30 days.

CONVENIENCE **PERFORMANCE** **PROTECTION**

TAKE THE HARD WORK OUT OF YARD WORK WITH TRUFUEL, THE ORIGINAL ENGINEERED FUEL FOR YOUR 2-CYCLE AND 4-CYCLE EQUIPMENT.

BUILT TO LAST

- 5-year shelf life unopened, 2 years after opening- unlike pump gas, it won't break down
- 40:1 and 50:1 2-cycle mixes use the exact fuel-to-oil blends recommended by equipment manufacturers
- 4-Cycle fuel's unique TF3® additive package keeps mowers, generators, power washers, and snow throwers running strong, even with limited use and/or long-term storage
- Ethanol-free, gum-and-varnish-free, benzene-free formula with balanced aromatics and proprietary stabilizer for easy starts, smoother idling, and stronger throttle response year after year
