CAMCO – RV Toilet Drop Ins

Directions:

Do Not mix with toilet chemical. Drain system and flush tank completely before using TST MAX. For best results, empty and flush waste tanks weekly, regardless of level. DO NOT OPEN INDIVIDUAL DROP-IN.

Holding Tanks: Add one drop in for each 40 gallons (151 L). Follow with 2 quarts of water (1.89 L) of water. For longer holding periods, larger tanks, or temperatures over 85F (29C) add an extra Drop-In as needed.

Portable Toilets: Add 1 Drop-In to tank and follow with enough water to cover the bottom.

Grey Water Tanks: Add 1 Drop-In through sink and flush with water for 30 seconds.

Recirculating Toilets: Use 1 Drop-In and follow manufacturer's directions.
