GUARANTEED TO WORK OR YOUR MONEY BACK

BENGAL ROACH SPRAY II

How It Works

- Bengal Roach Spray II expands to fill voids behind walls when sprayed and carries the killing agent deep into the nest.
- The penetrating fog drives insects out of hiding and kills them.
- Bengal Roach Spray II contains a high concentration of Permethrin, a synthetic pyrethroid which has residual killing power on insects.

How To Use

- Spray along baseboards, behind refrigerators, stoves, washing machines, under sinks, around automatic dishwashers, cabinets and other areas where insects may hide.
- Pay special attention to cracks, crevices, wall voids, and entry points such as doors, windows, vents, pipes, etc. using the extension tube.
