**GUARANTEED TO WORK OR YOUR MONEY BACK**

# BENGAL INSECTICIDE CONCENTRATE

## How It Works

- Bengal Insecticide Concentrate contains Esfenvalerate, one of the most powerful synthetic pyrethroids available.
- Treatments may be applied at 7 to 14 day intervals, or as necessary to maintain adequate control.
- Bengal Insecticide Concentrate may be used for local control of rice weevils, flour beetles, roaches, carpenter ants, carpenter bees and scorpions.
- This product does not harm paints, plastics, fabrics or any surface where water alone does no damage.

## How To Use

- Bengal Insecticide Concentrate must be mixed with water before use.
- Use a full 2 oz. bottle in a gallon of water to prepare the higher cleanout rate. A 2 oz. bottle will make 2 gallons of the maintenance rate.
- Add half the water to the sprayer along with the proper amount of Insecticide Concentrate.
- Agitate. Add remaining water and agitate again.
- Spray the areas that insects inhabit or are frequently seen. Pay particular attention to dark corners of rooms and closets, floor drains, cracks and crevices, baseboards, behind sinks, stoves, refrigerators, cabinets, around plumbing and other utility installations
- Let surface dry before allowing children or pets to contact surfaces.
