Manufactured in Worthington, MN

AquaSpherePRO sizes available:

SKU	TREATS:
51120	1,000 gallons
51117	1,000 gallons (3-pack)
51118	12,500 gallons (2-pack)
51112	50,000 gallons
51113	250,000 gal. (1/8 Acre)
51115	500,000 gal. (1/4 Acre)
51150	1,000,000 gal. (1/2 Acre)
51160	1,500,000 gal. (3/4 Acre)
51210	2,000,000 gal. (1 Acre)

Based on an average depth of 6ft.

## AquaSphere<sup>®</sup> PRO

### POND WATER CLEANER

#### ATTRIBUTES:

- Easy to use, no mixing
- 30-day time-release formula
- All-natural, safe and biodegradable over time
- Treat when water temperatures are between 45°F-110°F
- Improves water quality and reduces odors
- Veterinarian approved: safe for fish, plants, birds, animals, pets and people

#### WHEN TO USE:

- Pond has a history of dead organic matter
- Pond has sludge buildup
- Pond is producing an odor
- Low water clarity
- Along with other Healthy Ponds<sup>®</sup> products

**WHAT TO EXPECT:** Every body of water is different; therefore results may vary due to specific water conditions. The key to improved water quality is the monthly application of all-natural bacteria and enzymes that are included in the AquaSpherePRO. With continued use, you can expect improved water quality and clarity while eliminating odor.

With our all-natural treatments, your pond might look worse before it gets better. This is a common effort by organic growth in your pond to find nutrients, and show at the surface of the water. Rest assured, they will sink to the bottom, where they will be consumed by the beneficial bacteria in our products.

**IMPORTANT:** AquaSpherePRO contains a 30-day time-release blend of all-natural beneficial bacteria. To maintain water clarity you must add or replace the AquaSpherePRO every 30 days, regardless of the clarity of your water.

This is an all-natural system. It may require 4-6 weeks to achieve water quality improvement. For best results, a 15-day wait period is recommended after chemical application.

**NOTE:** In water features without a sludge layer, we suggest removing the spheres.

**STARTING IN MID-SEASON:** If water is already stagnant and overrun with organic matter, the recommended treatment would be to use **Healthy Ponds Natural Blast** and/or **Rush** with the AquaSpherePRO.

We also offer a variety of chemical products that effectively kill algae and aquatic weeds. To learn more, visit us online at [www.bioverse.com](http://www.bioverse.com) or call 877-948-0303.

**DIRECTIONS:** Use in self-contained ponds and retention areas.

1. Keep the AquaSpherePRO dry until pond application.
2. Treat when water temperatures are between 45°F-110°F.
3. Remove outer plastic bag and gently toss sphere into the pond. **Do not open the sphere**; the inner bags are water soluble and will dissolve upon water contact.
4. Treat every 30 days with appropriate number of spheres. **DO NOT under treat.**
5. Sphere placement: Evenly distribute spheres throughout the pond 10 feet from shoreline, if possible.
6. The AquaSpherePRO works well with all types of aeration. Avoid placing spheres directly by aerators.
7. The sphere sinks to the bottom of the pond after 30 seconds and begins to work instantly.

Once the AquaSpherePRO is submersed in the water it is important to not let the sphere dry out during treatment. The entire shell and all inner contents will compost in your pond over time. It is not necessary to remove the compostable sphere after the 30 days. For season-long care, repeat every 30 days while water temperatures are between 45°F-110°F.

DISCLAIMER: Products of this nature may reduce oxygen levels when used in poor health ponds that contain fish populations. Oxygen levels that get too low may produce localized fish deaths in any pond.

Molded from resins that have been certified compostable to the requirements of ASTM D6400 and shown to be marine degradable per the requirements of ASTM D7081.

**Questions?** E-mail us at [support@bioverse.com](mailto:support@bioverse.com) or give us a call, 877-948-0303. We want you to have successful results, so please don't hesitate to contact us. If you are not satisfied, we will make it right.
