

STEP 1

Lay out Front, Back and Side Panels as shown. Side Panels are the same height as the low sides of the Front and Back as pictured in step 2.

STEP 2

Starting with the Back and Side Panel attach the two panels together with the Back Panel on the **outside** using the two Clamps in the cut out spaces provided.

*NOTE: If you are removing the Pop- Out Panel, take it out before step 3.

STEP 3

Attach opposite Side Panel and then Front Panel (with two Clamps per corner) making sure that the Front and Back Panels are on the **outside** of the Side Panels.

STEP 4

Clamp Roof Panels to top of cage using two Clamps per Side. Keeping the cage and roof corners square is very important.

STEP 5

Repeat Step 4 for the 2nd roof panel.
