

INDOOR FLY TRAPSTIK®

DIRECTIONS FOR USE:

1. Tear perforated strip at left and remove cardboard to expose adhesive. (Placing TrapStik® upright on a stable surface allows better leverage.)
2. Hanging loop is built into cap. Insert index finger through hole to lift and bend up.

DIRECTIONS FOR USE:

- Hang indoors or sheltered locations.
- For best results, hang where you see flies (windows, mud rooms, garage, screened porch).
- Avoid using where children, birds or pets may come in contact with the adhesive.

Avoid touching the sticky surface. If adhesive contacts skin or hair, gently pull TrapStik away and the adhesive will release. Use petroleum jelly, baby oil or mineral oil to remove any adhesive residue.
