A PERFECT START

The nutrition kittens and puppies receive in the first year will impact their growth and their health for the rest of their lives.

MOTHER & BABYCAT FORMULAS

- Formulated for baby kittens (1-4 months) and queen cats (pregnant or nursing)
- Supports developing immune systems
- Promotes digestive health with a combination of prebiotics & highly digestible proteins
- Kibble (dry) and mousse texture in sauce (wet) helps a baby cat transition from milk to solid food

KITTEN FORMULAS

- Formulated for the second stage of kittenhood (4-12 months)
- Supports developing immune systems
- Promotes digestive health in older kittens' developing gastrointestinal systems
- Nutrition tailored to meet the high-energy needs of this stage in a cat's growth

PUPPY FORMULAS

- Promotes healthy growth
- Supports developing immune systems
- Helps cultivate optimal digestive health and stool quality
- Adapted kibble size to encourage puppies to chew thoroughly

COMPLETE OFFER

COMPLETE & BALANCED NUTRITION, HOWEVER YOU CHOOSE TO FEED

Incorporating a combination of dry and wet food can benefit your cat or dog.

Kibble texture and shape encourages chewing and a brushing effect on the teeth, while moisture content in wet food can help support healthy hydration.

HEALTH NUTRITION

Formulas created to deliver nutrition tailored to your cat or dog's health needs based on their age, lifestyle or size.

FELINE HEALTH NUTRITION™

Lifestyle, sensitivities and age are all crucial considerations when it comes to choosing the right food for your cat. Royal Canin has nutrition for all stages of your cat's life.

SIZE HEALTH NUTRITION™

Different sizes of dogs have very different physiological needs. That's why Royal Canin created 5 size-based ranges to address their nutritional needs.
