

No Thrush<sup>®</sup>

Four Oaks Farm

All Natural! No Stains!

First Ever DRY Formula!

Just “Dust-On!”

Attack Thrush, Maintain Healthy Hooves, Firm Up Tender Frogs.

Also use for:

Scratches

Mud Fever

Rain Rot

Coat Fungus

Directions: Shake bottle to loosen settling. Snip top above cut line.

THRUSH: Clean off debris with pick/brush. For fastest results, keep hoof dry.

However No Thrush works well in rainy climates. Thoroughly dust frog and be sure to get powder deep into all grooves and heel cracks. Final step: Brush powder into the frog and heel to ensure complete coverage under all skin tags. Use once daily until there is no visual thrush remaining and the heel bulbs are firm. If crack between heel bulbs is present (crack is caused by sulcus thrush), continue use 3-4x per week until crack is regrown and closed (typically takes 20-40 days).

MAINTANENCE: Do not wait for thrush to return! To stay out of the “thrush cycle”, use No Thrush at least once per week. Use more often in wet weather.

SCRATCHES, RAIN ROT, COAT ISSUES: Keeping the coat dry, apply powder directly to problem area 1-2 times per day. Do not wash and do not remove scabs.

Caution: Not for human use. Do not take internally. Avoid direct contact with eyes. Use in well ventilated area. Use mask if desired.

Ingredients: All natural proprietary mix of multiple clays and silicates, salts of copper 15%-active, iron, diatomaceous earth, oregano powder.
