

## **Feeding Instructions**

## **Guaranteed Analysis**

## **Ingredients**

### **NURSING FOALS:**

All foals should be started on a creep feed about 30 days after birth. Mix 2 oz. of Formula 707 with a pound of oats and feed this mix to the foal every day. As the foal grows, increase the oats to whatever amount it will clean up readily every day.

### **WEANLINGS:**

Horses at the weanling stage need more supplement per pound of body weight than do older animals. Continue to feed the 2 ounces of Formula 707 along with 8 to 10 lbs. of oats, a pound of dehydrated alfalfa pellets, a pound of good oil meal, and 6-8 lbs. of good quality grass-legume hay every day. For more fat on weanlings, replace a couple of pounds of oats with 2 lbs. of corn.

### **ADULT HORSES:**

Feed 1-1 1/2 scoops (2-3 oz.) daily to average 1,100 lb horse.
