

INSTRUCTIONS

Gumout 16 oz. Multi-System Tune-Up Additive

Model# 510011

Add to fuel: For optimal results, add entire can to the tank. Fill the tank with fuel and run to near empty before refueling. One pint treats 18-21 gallons of all types of gas or diesel fuels.

Add to oil: Add one ounce per quart of oil. Immediately start engine and run for 5-10 minutes to mix completely.

Vacuum Intake Cleaner: May be used with engine decarbonizing equipment through the vacuum system to clean intake manifold, valves and combustion chamber. Follow recommended mechanical procedures for the equipment.

Small 4-cycle engines: Add to gasoline using $\frac{3}{4}$ to 1 ounce per gallon of fuel.

Small 2-cycle engines: Add to gasoline using $\frac{3}{4}$ to 1 ounce per gallon of fuel. Add 2-cycle oil as recommended by engine manufacturer. Gumout® Multi-System Tune-Up does not replace 2-cycle oil.
