1. Install hinge bracket (A) to wall (stationary side of gate) using Phillips screw (C) beginning 6 1/2" above floor surface.

2. Install second screw (C) in top of hinge bracket securing it to the wall.

3. Insert eye bolts (D) into top and bottom of hinge side gate (side with three holes). Be sure nuts are tight.

4. Hang gate by inserting hinge rod (B), through top of mounted hinge bracket (A), through upper plastic shoulder washer (E), through both eye bolts, through lower plastic shoulder washer (E), and finally through bottom of hinge bracket. To secure hinge rod, insert key ring (H) through hole in end of hinge rod.

Swing gate out of way and mount latch assembly to wall. Check closure of gate and tighten set screws from STEP 5 to secure gate width.

GATE CARE & REMINDERS

At **CARDINAL GATES, INC.**, we design what we believe to be the very best, and most user friendly gates available. Our gates are built to last many years with proper use and care. Here are a few suggestions...

- Close gates gently - do not slam - to prevent damage to latch mechanism.
- When closing, be sure safety bracket on gate frame engages as depicted in instructions.
- For safety, always close gate when not in use. Children should not be allowed to swing on an open gate as this can damage hinge mount.
- Keep allen wrench in a secure place. We suggest removing set screws when separating sections for cleaning. Periodically check all screws, bolts, etc. for security and proper adjustment.

CARDINAL GATES, INC., offers many accessories such as extensions, stair kits, and other safety products. Check with your dealer or call **CARDINAL GATES, INC.** at 1-800-318-3380.
