

# **ALL-SEASON PROTECTION SNOW THROWER COVER**

## **INSTALLATION:**

Check your snow thrower to make sure there are no sharp objects or corners that could stress your cover as you pull it on.

Pull your cover out of its storage bag. **NOTE:** Cover and storage bag are sewn together. Along the bottom hem of your cover (the open end) you will find a small tag that reads "FRONT" with two arrows. With this section to the front of the snow thrower, slip your cover over the handlebars and down over your snow thrower. You may need to adjust the control levers on your snow thrower to obtain a good fit. Secure the cover by tucking the elastic cord under the housing and wheels.

## **CLEANING:**

Clean your cover with a soft brush and lukewarm water. Do not use soap as it may remove the protective coatings added by the factory.  
Line dry only.
