

PROTECT™

added nutrition for your newborn calf

FEEDING DIRECTIONS

Protect should be fed in addition to colostrum and has its greatest impact when fed within 4 hours of birth. Mix 4 1/4 cups with 1.5 quarts of warm (105°F/40°C) water. Stir until completely dissolved. Feed to the calf in one feeding via nipple feeder or esophageal feeder as soon as possible following birth.

STORAGE

Store at room temperature in a dry place. Use mixed product immediately – do not store. One 10-pound pail includes 10 calf feedings.
