HEART SHAPED TREATS!

Nutritional Necessity

Honoring your First Promise to your horse, we have created the perfect treat – showcasing the amazing wonder food – FLAX – nature’s perfect balance of Omega-3-6-9 fatty acids, prebiotic fiber and antioxidants that may help support shiny, healthy coat; strong, solid hooves; strong immune system and digestive stability for total health – for horses in all life stages.

CUSTOMER TESTIMONIALS

“These are the best treats for training! They break very easily into smaller pieces, which I love when working with my horses on tricks. They are also crunchy, but not hard or sticky so my horses don’t struggle at all to munch on them. I love that they also provide extra nutrients, without extra sugar!”

~ Rachel Long, When-it-clicks.com

TUCKER & TRUBEE

JOE CAMP & CASH

“I had been searching a long time for a treat that is actually good for my horses. A treat that isn’t loaded with sugar or molasses, or grains which are mostly non-structural carbs which turn to sugar when metabolized, or soy, or hydrogenated vegetable fats or oils. We train with treats and use a lot of them.

I’m so excited that I finally found Omega Nibblers Low Sugar & Low Starch. From people who actually

care about your horse’s health and happiness. This is the singular best treat on the market as far as I’m concerned because it is the only treat I have found that uses 99.9% pure Non-GMO stabilized ground fortified flax. That’s .9% higher than required for human food grade. Nobody else this.”

~ Joe Camp, The Soul of a Horse
