

**9682088-8" Bench & 2" Belt Grinder  
COMBINATION  
BENCH & BELT GRINDER**

<b>FEATURES</b>	<b>ADVANTAGES</b>	<b>BENEFITS</b>
Two machines in one	Ideal for grinding, Deburring, finishing flat or contour parts	Versatile & economical Simple to use Faster operation Improved productivity
Dynamically balanced rotors and sealed bearings	Minimizes vibration Keeps grinding particles out of bearings	Ensures smooth running Improved grinding & finishing performance
Front mounted safety on/off switch with lock out key	Located for greater operator convenience and ease of operation	Greater operator safety
Adjustable work rests with hurricane bolts	Allows for angle finishing Fast easy adjustments Positions smaller workpieces for easy safe material removal	Greater operator safety and convenience Improved part finish Improved efficiency & productivity Greater accuracy
Wheel guard	Prevents dust & grinding particles from escaping Effectively ventilates grinding particles to dust port	Increased operator safety Cleaner work area
Simple belt tensioning and adjustment	Fine thread adjusting screw with tension lever allows for fast belt changes	Faster set-ups Greater operator convenience
Full belt guard	Prevents dust & grinding particles from escaping by effectively ventilating the contract tire & drive drum with air circulation from the belt	Increased operator safety Cleaner work area Quiet operation Effectively moves grinding particles to dust chute for extraction
Belt head is adjustable	Belt head can be positioned in the vertical, horizontal or any position in-between for flat, miter & contour finishing	Faster set-ups Greater operator convenience More versatile Increased productivity
Front mounted on/off paddle switch with lock out key	Located for greater operator convenience and ease of operation	Greater operator safety

<b><i>FEATURES</i></b>	<b><i>ADVANTAGES</i></b>	<b><i>BENEFITS</i></b>
Dust collection ports	Easy duct collection hook-up	Promotes safer cleaner, work area
