

9682401-1" Belt Grinder

9682402-2" Belt Grinder

9682404-4" Belt Grinder

BELT GRINDERS

FEATURES	ADVANTAGES	BENEFITS
Powerful capacitor motor	Capable of running long duty cycles under load	Improved grinding & finishing performance Powerful, quiet & efficient More versatile Fast material removal
Belt head is adjustable	Belt head can be positioned in vertical, horizontal or any position in-between for the flat, miter and contour finishing	Fast set-ups Greater operator convenience More versatile Improves productivity
Simple belt tensioning and adjustment	Fine thread adjusting screw with tension lever allows for fast belt changes	Faster set-ups Greater operator convenience
Full belt guard	Prevents dust & grinding particles from escaping by effectively ventilating the contact & drive drum with air circulation from the grinder	Increases operator safety Cleaner work area Quiet operation Effectively moves grinding particles to the dust chute for extraction
Dust collection port	Easy dust collection hook-up	Promotes cleaner, safer work area
Adjustable tool rest with hurricane bolts	Allows for angle finishing Fast easy adjustments Positions smaller work pieces for easy, safe material removal	Greater operator safety & convenience Improved part finish Improved efficiency & productivity Greater accuracy
Front mounted on / off paddle switch with lock-out key	Located for greater operator convenience and ease of operation	Greater operator safety
