

PRIVACY SCREEN

Fits 10ft. x 10ft. STAY Series Kennels

LUCKY DOG®

*Your Kennel or Cover
Design May Vary

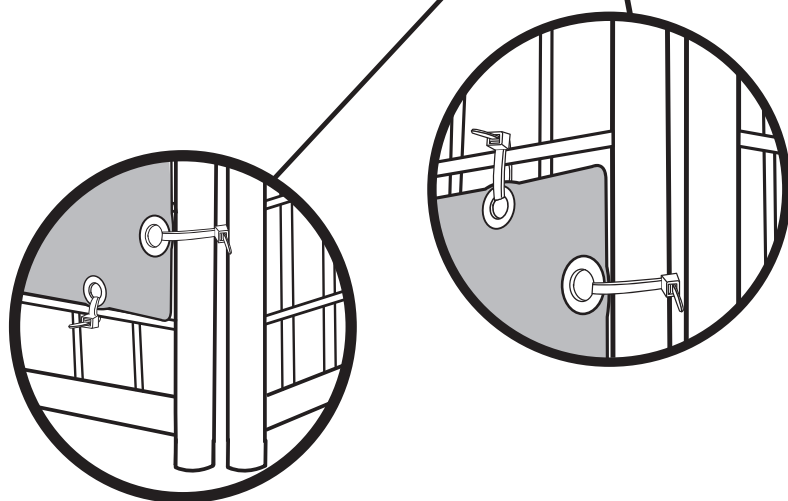

- Start by attaching privacy screen at corner of kennel next to the door by threading included zip ties through grommets and attaching them to the kennel frame. Leave zip ties loose until the entire Privacy Screen is attached.

- Move to the next set of grommets, making sure you don't allow any slack in the screen between connection points. Continue working your way around the kennel until you are finished.

- Tighten all zip ties.

NOTE:

Privacy Screen should be tight against frame, but not stretched out.
