

Give your customers their own refueling station in the bed of their trucks.

Customers will thank you for the refueler that doesn't require removal of the pump for safe, legal travel on the highway!

Don't be fooled by cheaper, often foreign-made tanks that house the pump on top of the tank. They might not be legal for transport of fuel and rarely include everything needed for installation.

All Transfer Flow refueling tanks are certified legal for gas and other fuels by the U.S. Department of Transportation (D.O.T) and come complete with everything customers need.

Link your brand to superior aftermarket fuel tank systems by selling Transfer Flow products: legal, rugged, engineered and manufactured in the U.S.A., these tanks are ready to fuel customer adventures wherever they go!

The pump sits below the height of the tank. Comes complete with everything needed for installation.

SELLING TIPS

- Recommended for customers who own ATVs, boats, landscape or farming equipment, generators, or want the option to fuel their truck or additional vehicles
- Ships complete with 12-volt GPI® fuel pump, 12 ft. hose, nozzle, SpinSecure® locking cap, handle lock, wire harness with cab-mounted power switch, and mounting hardware
- No need to remove pump while driving
- Easy-to-use hose purge feature
- Recessed, low-profile fuel pump
- Pumps up to 15 gallons a minute
- Built from 12-gauge, high-yield U.S. aluminized steel for superior rust resistance and strength
- Baffled to prevent fuel sloshing
- UL® listed fuel hose
- Optional upgrades: external fuel filters, electronic fuel meter, and spray-on coating
