About Ecofan®

Ecofans are innovative, whisper-quiet hearth accessories. When placed on top of a stove, Ecofans create their own electricity and start automatically... they don't need household energy or batteries!

Designed with care and built with quality materials in Canada, you can rely on the award-winning* Ecofan to meet cold winter expectations. The Ecofan family includes models to suit a variety of room sizes.

Proven to reduce fuel usage by up to 18%!

Representatives from the *Faculty of Engineering at the University of Waterloo* tested an Ecofan and proved it can reduce fuel usage by up to 18%.

Testing also confirmed a reduction of particulate and carbon emissions... an extra incentive for green-focussed customers!

About Caframo

Caframo has been designing and building innovative products for over 60 years in Warton, Ontario. We are committed to growth:

- marketing efforts for Ecofan reached over 6 million people in Q4 of 2016
- 2 new products this year and more to come

Being part of our community is important, which is why approximately 90% of our consumer products are made here and that number is growing. We also give back, by supporting a different local charity every year.

BOOST OVERALL SALES BY
60
PERCENT**

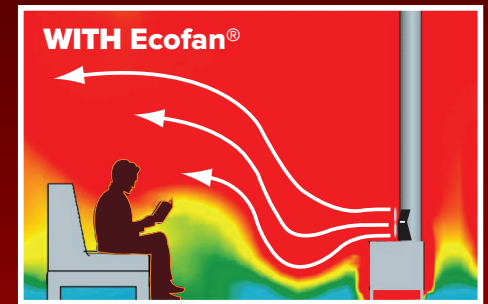

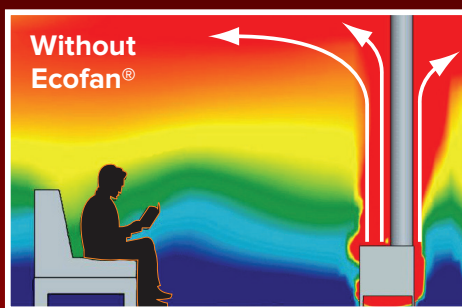

Just add a SKU!

One of our retailers added a new Ecofan SKU and found that sales of their original SKUs

increased! They saw a remarkable 60% increase in overall sales.

**Based on a Canadian retailer case study.
