

## Flat-Free Tire Ramps

Thank you for choosing this fine product from MAXSA Innovations. This product was invented for a customer who was storing a classic Cadillac and had the tires go out of round. Your Flat-Free Tire Ramps evenly distribute vehicle weight as their contoured shape prevents annoying flat-spots, tire deflation, deformation, and moisture damage during long-term storage.

"We hope you will love these Flat-Free Tire Ramps"

Skip West - Founder & President of MAXSA

### USEFUL INFORMATION

- 1) Position the vehicle where you intend to store it, then reverse straight back 2' to 4'.
- 2) Place the **Flat-Free Tire Ramps** in front of each tire on a level surface.
- 3) Drive vehicle slowly up onto the Ramps until the tires roll into the cradle.
- 4) Occasionally the ramps will slide on slick floors. If that prevents your units from working well, we can provide **additional rubber grips** for your Ramps at no charge. Please contact MAXSA at 703-495-0661.

### DISCLAIMER

MAXSA Innovations is not responsible for any misuse of the Flat-Free tire Ramps or for any injury or damage incurred.

### ANY QUESTIONS?

To provide feedback, get a full MAXSA catalog or to order more Flat-Free Tire Ramps, please call 703-495-0661 or visit [Maxsainnovations.com](http://Maxsainnovations.com). Maxsa also creates innovative automotive accessories to help park your vehicle, to never get stuck in snow, sand or mud when going off-road and to keep your car neat and organized. We also make great solar and battery-powered outdoor lights.
