HINGE JOINT FIELD FENCE

OKBRAND Field Fence (woven-wire) is manufactured in a wide variety of heights and styles and features a graduated spacing that starts with small openings at the bottom, helping to prevent entry by small animals. The Hinge-Joint Knot allows the fencing to give under pressure and spring back into shape. It also expands or contracts under changing weather, giving flexibility and added strength. This quality fencing ensures a solid construction over any terrain. Our field fence is designed using a variety of spacing configurations to accommodate horses, cattle, hogs, and other large animals.

What do the numbers in the product description mean?

1047-6-12.5
