

Specifications, Details & Support

Product Description

Magnum Gatorline Trimmer Line is ideal for professionals who need long-lasting, powerful tools to get the job done right. It quickly and easily cuts through low grass and grass-like weeds yet is durable enough to tackle sizable brush without breaking. This trimmer line is less likely to bond together in the trimmer head due to its weld-resistant outer layer. .095" diameter trimmer line is an ideal fit for many string trimmer models, including but not limited to: Echo SRM 235 and SRM 230, Stihl FS 56 RC and FS55 R, Husqvarna 128LD, DeWalt DCST970X1, Ryobi RY253SS and Troy Bilt TB 22. Magnum Gatorline is compatible with most trimmer head systems including fixed-line, semi and automatic bump-feed heads. Additionally, it fits most gas, electric and battery-powered curved and straight shaft string trimmers. Check your string trimmer manual for recommendations and to ensure that larger lines will work with your trimmer.

Product Details

- High cutting efficiency – Magnum Gatorline allows you to get cleaner, straighter cuts with less effort than traditional trimmer line
- Durable – High-strength inner core resists breakage which means that the line lasts longer and you spend less time winding spools
- Square trimmer line – Slices through vegetation with a clean, even pass
- .095" diameter trimmer line is a good size for cutting heavier weeds in your lawn or performing light commercial work
- Fits many popular string trimmer models including, but not limited to: Echo SRM 235 and SRM 230, Stihl FS 56 RC and FS55 R, Husqvarna 128LD, DeWalt DCST970X1, Ryobi RY253SS and Troy Bilt TB 22
