

Water Saver[®]

All Other Fescues

Water Saver[®] with RTF[®]

Unlike all other fescues, revolutionary RTF[®]

- **Repairs itself**
- **Fills in bare spots**
- **Produces a thick, even lawn in sun or shade**

**Water Saver[®] with RTF[®]
The Only Seed You'll Ever Need[®]**

Product protected under U.S. patent no. 6,677,507.

Water Saver[®]

FEATURES AND BENEFITS

Self-repairing turf

- ▶ Knits the lawn together.
 - ▶ Quickly fills in damaged or open spots with new shoots of grass.
-

Strong, deep root system

- ▶ Ability to anchor itself more quickly into the soil.
 - ▶ Excellent drought and heat tolerant with less irrigation.
-

Grows great in sun or shade

- ▶ Excellent in the transition climate zone.
-

Excellent color and disease resistance

- ▶ Withstands stressful weather conditions and keeps its rich green color, even through winter's low temperatures.
 - ▶ Provides excellent protection against insects, diseases and enhances drought tolerance.
-

Rapid germination and quick spring green-up

- ▶ Establishes quickly. Produces a greener lawn earlier in the spring.
-

Higher value for the homeowner than conventional fescues

- ▶ Ordinary fescues require maintenance from overseeding, weed problems, and clumps. RTF[®] results in less overseeding, fewer weed problems and no "wide-leaved ugly clumps" of tall fescue plants in open areas.
-

SEEDING RATE

- ▶ 5 to 10 lbs. per 1,000 sq. ft.
