

Ultra PestChaser®

Instructions

1. Plug the Ultra PestChaser into the lower socket of a 110V-AC wall outlet using the 6 foot cord provided. The ideal placement for the Ultra PestChaser is in the corner of the room and close to the entrance of the room. We recommend using one Ultra PestChaser per large size room. The Ultra PestChaser is ideal for businesses and warehouses because it has 3X the output and coverage as the mini units.
2. The red LED light will illuminate showing the unit is functioning properly. The light mimics the ultrasound pulsating from the unit and can be turned on or off.
3. Clear all surrounding objects away from the Ultra PestChaser. The ultrasound emitted from the Ultra PestChaser does not travel through walls, furniture, cabinets, or any other object.
4. Then, just sit back, relax and forget. Reduction in rodent activity should occur within 6-10 days.
