

## **COOL DOWN**<sup>™</sup> **COOLANT ADDITIVE**

Cool Down<sup>™</sup> improves the performance of your coolant and is safe for all radiator systems - ideal for racing, street, RV and tow vehicle applications. It reduces cylinder head temperatures up to 75°F! Cool Down™ increases coolant flow for better heat transfer, lubricates all vital components and is approved by most race sanctioning bodies. One 16oz. bottle treats cooling systems of 12-20 guarts. Treatments last for one year or 30,000 miles, whichever comes first.

Reduces cylinder neuco control overall coolant temps by up to 30°F Reduces cylinder head temps 75°F and

- Improves coolant flow for better heat transfer
- Lubricates all vital components

**Protects sensitive aluminum alloys**
