

Stone Instructions

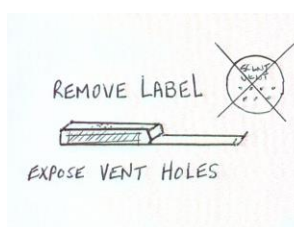

Please Read and Follow These Step by Step Instructions

1. Open but **DO NOT** discard the plastic clamshell casing and save the graphics insert card with the instructions.
2. Leave the rear of plastic case open with the Stone face down in the plastic clamshell casing. (see diagram below)

We suggest performing the remaining procedures outside so that the scent doesn't permeate your home.

3. Remove the Just Scentsational liquid scent pack and carefully tear or snip a corner. Slowly pour the full content of the scent pack on the Stone until all the liquid scent is distributed and absorbed. Then flip the stone over so that the side onto which you have poured the liquid scent pack is facing upward toward the holes in the plastic case.
4. Close the rear of the plastic case firmly.
5. With the rear of the plastic clamshell case firmly closed, turn the clamshell casing on its back and remove the green and white scent vent label from the front of the case exposing the scent vent holes and allowing the scent to escape.

6. Place the plastic clamshell case with the scented Stone in a selected area where you want the effects of the Stone to occur. You can place the Stone within the case down on the ground or you can choose to hang the Stone in its case slightly off the ground either attaching it to a stake or to a tree.
7. Follow the instructions on the rear of the graphics insert card that came inside your plastic clamshell casing.
