

*Van Zyverden's*  
**APPLE TREE HONEYCRISP**

Honeycrisp apple trees, are a popular choice throughout the USA. It grows large red apples with cream colored flesh. While it's grown for fruit production it also makes for an excellent garden ornamental as it produces pinkish white blossoms in April and attracts birds, hummingbirds and butterflies.

*Grown both for its fruit  
as well as its  
ornamental features*

*Apple colored blossoms in April*

*Fall fruit add color  
and interest to the garden*

*About This Variety:* For optimal performance; rooting, growing, fruiting and to keep its height in check, it is grafted/budded onto Malus domestica root stock which makes it a premium tree.

*Growing Instructions:* Plant where it will receive at least six hours of direct, unfiltered sunlight daily. Before planting protect the tree from freezing, overheating, drying out or injury. If the roots have dried, soak them in water about 24 -48 hours before planting. Dig a hole twice the diameter of the root system and two feet deep. Replace some of the loose soil so that the roots can easily penetrate the soil. Spread the roots on top of the soil, planting it at soil level. Firm soil and water well. Do not fertilize at planting time.

*Care Tip:* Need full sun for maximum flower and fruit production.

*Exposure:* Full sun

*Height:* 15-20'

*Spacing:* Plant- 18-25' apart, soil line deep

*Hardy in:* USDA zones 4-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
