

RSI Flooring Tile Assembly

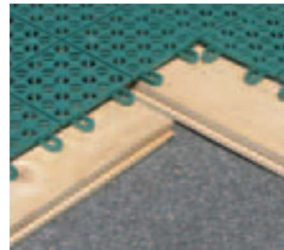

www.RSIWW.com

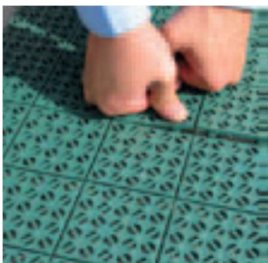

1. Place flooring tile with the attachments on the right side and on the bottom side.

4. To place tiles on uneven surfaces place a wooden board under the tiles first.

2. Fix the tiles one to another by moderately pressing or using a small rubber mallet.

5. Flooring Tile can be easily stored even rolled.

3. Continue the laying the tiles in horizontal rows, starting from left to right and from top to bottom.

6. Finished product provides years of safe, dry, and clean environments.

Helpful Hints:

- 1- Hose to Clean
- 2- Individual squares can be snapped off for custom fits around obstructing objects
