

Van Zyverden's
NEW IRIS SIBERICA HOW AUDACIOUS

The rhizomes produce narrow, grass-like leaves on strong stems. They are a very good naturalizer. Siberian Iris are suitable for borders, garden beds, wild gardens, along the edges of ponds, but not for growing in water. They do, however, combine easy care with grace and beauty. They make stunning cut flowers!

*New award winning
Siberian Iris variety*

*Ideal on the edge
of a water garden*

*Blooms after the
German Bearded Iris*

About This Variety: Iris How Audacious has a very unique and stylish look. Each stem produces several delicate flowers which are reddish-violet with white veining and yellow centers.

Growing Instructions: Plants grow best in moist acidic soil but also tolerates drier soil.

Care Tip: Upon receipt, soak your rhizomes in water overnight to jump start growth. Fertilization does them well. It is a good idea to remove spent bloom stalks both for garden appearance and to prevent reseeding. Feed in spring with a nitrogen rich fertilizer.

Exposure: Sun to partial shade

Height: 24-42"

Spacing: Plant- 36" apart, 1.5-2" deep

Hardy in: USDA zones 3-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
