

*Van Zyverden's*  
**NEW IRIS SIBERICA SPECIALITY MIXTURE 339**

The rhizomes produce narrow, grass-like leaves on strong stems. They are a very good naturalizer. Siberian Iris are suitable for borders, garden beds, wild gardens, along the edges of ponds, but not for growing in water. They do, however, combine easy care with grace and beauty. They make stunning cut flowers!

*New Siberian Iris varieties*

*Ideal on the edge  
of a water garden*

*Blooms after the  
German Bearded Iris*

*About This Variety:* This specialty Iris mixture of new varieties is so new that is simply called Mixture 339.

*Growing Instructions:* Plants grow best in moist acidic soil but also tolerates drier soil.

*Care Tip:* Upon receipt, soak your rhizomes in water overnight to jump start growth. Fertilization does them well. It is a good idea to remove spent bloom stalks both for garden appearance and to prevent reseeding. Feed in spring with a nitrogen rich fertilizer.

*Exposure:* Sun to partial shade

*Height:* 24-42"

*Spacing:* Plant- 36" apart, 1.5-2" deep

*Hardy in:* USDA zones 3-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
