

Van Zyverden's
HIBISCUS S. LUCY RED

Hibiscus Syriacus Lucy, also commonly called the Rose Of Sharon, are large shrubs or small trees that produce red, trumpet-shaped flowers over a long season. It is a high impact flower that will make a garden in any part of the world look like a tropical paradise. It is also known as a hardy hibiscus in USDA zones 5-8. They can be planted by itself, used as a specimen plant, or grown as hedge plant. They can also be pruned into a single stemmed small tree.

*Many months
and years of bloom*

*Tolerant of summer heat,
humidity, deer,
drought and clay soils*

*Vigorous grower that
typically grows 8-12' tall*

About This Variety: Lucy is a double-flowered cultivar. It blooms profusely from late summer into the fall. It does not require much care and will do well in average soils.

Growing Instructions: Dig a hole about a foot deep and a foot wide. Set the plant in the hole, and fill it half full with soil. Water. After water is drained, fill the rest of the hole with the remaining soil. Then water thoroughly again and continue doing so regularly. Fertilize at planting and then again each year after flowering.

Care Tip: Best flowering happens in full sun. Light or no pruning will allow it to bloom profusely with smaller flowers, while heavy pruning will produce larger but less flowers.

Exposure: Full sun to part shade

Height: Grows 6-8' tall

Spacing: Plant- 6' apart, plant crown at soil level

Hardy in: USDA zones 5-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
