

Show Goat

Purina® Honor® Show Feed

Commotion™ Goat DX30

Change is constant. Honor® Show Feed Commotion™ Goat DX30 show goat feed is causing quite a stir and changing the way you feed your show goats.

A high-energy formula designed for all lifestages, Honor® Show Feed Commotion™ Goat DX30 is especially adept as a creep and sale prep feed. The semi-textured form is unique and provides balanced, cutting-edge nutrition for today's modern show goats.

FEATURE

BENEFIT

Versatile, palatable, high-energy formula

- Formulated for all lifestages and ideal as a creep and sale prep feed
- Provides the proper balance of high quality proteins, vitamins, minerals and other nutrients
- Designed to help provide the needed fuel for growth and development of modern show goats

Specific protein sources

Targets muscle development and expression needed for the show ring

Semi-textured form

Blend of pellet and steam-flaked barley which helps provide the finish needed in today's show goats

Medicated with Decco[®] (decoquinate)

For the prevention of coccidiosis - helps support normal immune system

Ammonium chloride

Helps lessen the likelihood of urinary calculi

Tasco[®]

Research has shown that TASCO[®] helps lower body temperature during heat stress, keeping animals on feed

Diamond V[®]

- Diamond V[®] Yeast Culture is a true, fully fermented yeast culture developed specifically for optimum animal nutrition
- Research proven, Diamond V[®] Yeast Culture has a unique ability to support ration digestibility, palatability, and intake by delivering a rich, all-natural nutrient source to the animal's digestive bacteria
- Diamond V[®] Yeast Culture can help your animals reach a higher nutritional plane

Availa[®] 4

- Balanced combination of zinc, manganese, copper and cobalt
- Provides critical highly-available minerals that helps support immune response which is critical for maintaining healthy traveling show animals
- Helps maximize muscle development; allows goats to reach their full potential

PuriFerm™

A uniquely formulated fungal enzyme ingredient containing both *Aspergillus oryzae* and *Aspergillus niger*. Fungal enzymes help in the digestibility of fibrous feedstuffs, thereby helping support growth performance.

Research Proven

Feed it with total confidence; backed by Purina's legendary tradition of fundamental and applied research, thousands of winning entries at local and national shows

Commotion™ Goat DX30

Guaranteed Analysis:

NUTRIENT	LEVEL
Crude protein, min.....	16.50%
This includes not more than 1% equivalent crude protein from non-protein nitrogen.	
Crude fat, min.....	4.00%
Crude fiber, min.....	12.00%
Calcium (Ca), min.....	0.65%
Calcium (Ca), max.....	1.15%
Phosphorous (P), min.....	0.35%
Salt (NaCl), min.....	0.50%
Salt (NaCl), max.....	1.00%

NUTRIENT	LEVEL
Selenium (Se), min.....	0.30 ppm
Vitamin A, min.....	10,000 IU/lb
Vitamin A, min.....	3,200 IU/lb
Vitamin A, min.....	50 IU/lb
Copper (Cu), min.....	18 ppm
Copper (Cu), max.....	28 ppm

Directions:

Feed at a rate of 0.757 lbs to goats/kid weighing 50 lbs to provide 22.7 mg decoquinatate per 100 lb of bodyweight (0.5 mg/kg) per day. Feed at least 28 days during period of exposure to coccidiosis or when it is likely to be a hazard.

Important:

1. Start kids on colostrum milk from birth to 3 days of age. Feed Purina® Kid Milk Replacer from 2 days until 4-8 weeks of age.
2. Use Honor® Show Feed Commotion™ Goat DX30 as a creep feed for rapidly growing young goats prior to weaning.
3. If kids have not been creep-fed or they were purchased, they should be placed on grass hay on a free-choice basis after arrival. On the second day, feed Honor® Show Feed Commotion™ Goat DX30 at the rate of 1% of their body weight and offer free-choice forage or hay. Gradually increase the amount of Honor® Show Feed Commotion™ Goat DX30 and decrease the amount of hay over a 3-week period of time so that by the end of 3 weeks, they are consuming 3-4% of their body weight as Honor® Show Feed Commotion™ Goat DX30. After 3 weeks, Honor® Show Feed Commotion™ Goat DX30 should be the sole diet and no additional forage is required.
4. When making a ration change, allow 3 to 5 days for animals to adjust to the new ration.
5. Keep a constant supply of complete feed available. Do not let fine material accumulate in feeders.
6. Provide adequate, well-protected and well-managed bunk space for each animal to prevent feed from becoming wet or moldy.

7. Provide a source of fresh, clean water at all times.
8. Feed salt free-choice.
9. Feed Purina® Goat Mineral free-choice.
10. Consult your veterinarian for the recommended health program for your local area. This includes internal and external parasite control.
11. This product contains copper and should not be fed to sheep. In groups of goats, there are certain animals that experience chronic bloat or other digestive disturbances, and consequently are poor performers. In addition, excess feed consumption, severe weather changes resulting in erratic feed consumption and poorly-managed feeding practices can increase the incidence of bloat in all goats. If bloating occurs, the above management practices should be reviewed and your veterinarian consulted.

Caution:

Do not feed to sheep or other copper sensitive animals. Bentonite should not be used in decoquinatate feeds.

Store in a dry, well-ventilated area free from all rodents and insects. Do not use moldy or insect-infested feed.

Warning:

Do not feed to sheep and goats producing milk for food. This product was made in a feed manufacturing facility that does not handle or store products containing animal proteins prohibited in ruminant feed.
