

Bump-n-Go Fire Truck with Lights Sound

Bottom of Truck

How to Operate:

1. Remove battery cover on the bottom of the truck and insert three AA batteries.
2. Remove the round black cover over from the bottom of the truck to activate the wheels that will propel the truck forward and backward.
3. Switch the truck to the ON button on the bottom and watch the truck move forward and backward, changing direction as it bumps into things, along with lights and sounds.
