

Ensuring your Thriver Calf Teat is installed correctly is key to achieving optimal milk flow and keeping your calves consistently fed.

SCREW-IN

- Position the Skellerup Viking Ship or Thriver logo so it is facing upwards in a vertical position.
- Avoid over-tightening as this can create inconsistent milk flow.

PULL-THROUGH

- Run your finger along the feeder holes and file or sand any sharp edges as these can damage the teat.
- Position the Thriver logo so it is facing upwards in a vertical position.

CLEANING

- After each use, rinse thoroughly to remove any milk residue.
- Use warm soapy water and a brush to clean your feeder.
- Rinse thoroughly and flush water through the teats by pumping.
- Allow the teat to dry completely before reuse.
