Happy Ride™ BOOSTER SEAT

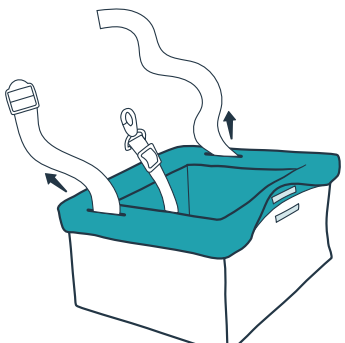

Let's make every seat a window seat.

1

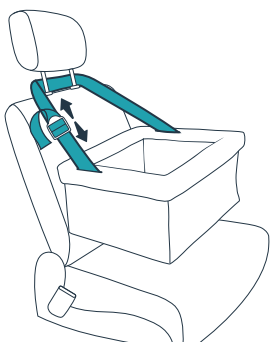

Insert the U-shaped bracket. (If you have the largest booster seat, first connect the two bracket pieces.) Insert the bracket arms into the two plastic tubes at the front corners.

2

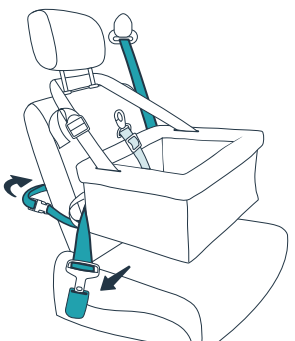

Place the liner in the booster seat and pass the safety tether through the slit at the center back. Unfasten the headrest strap and pass each end through the slits in the liner. Press the hook and loop fasteners together.

3

Refasten the headrest strap and loop it over your vehicle's headrest. Adjust the height so your pet can see out the window.

4

Buckle the seat belt through the two loops on the back of the booster seat. If you're using it on a bucket seat, fasten the lower strap snugly around the back of the seat.

Always attach the safety tether to your pet's harness and adjust it to keep your pet secure and safe inside the booster seat.
