

Stall Door Guard with Hardware

Item: KDSG

Kensington's stall door guard was designed to keep all sizes of equines inside their stall. The guard is made with our durable Textilene® mesh, and bordered on all sides with 3 inch nylon webbing. It measures 34.5 inches long by 36 inches wider, and it fits openings from 44 to 47 inches using the adjustable straps. Beautiful coordinating hardware completes the look and includes six heavy duty d-rings, double ended snaps, and screw eyes for installation. The solid web center is ideal for personalization, and looks stunning with embroidery.
