

Van Zyverden's
PAPERWHITE KIT WITH CLEAR ARTISAN GLASS

Forcing Paperwhites indoors on water is simple, easy, and fun. It just takes a little patience. We even supply a special glass. Anyone can do it.

Sweet fragrance

Easy and simple indoor color

*Kit comes with everything
one needs to grow this exotic plant*

About This Variety: Included is one very large 19/+ cm Ziva Paperwhite bulb and a clear, sturdy, artisan glass especially designed for this purpose.

Growing Instructions: Fill the special forcing glass with water to just below the area where the bulb will rest (the bulb will reach for the water). Place the Paperwhite bulb in the cup, root end down and growing pointy end up (growth may already be showing) so the base is barely touching the water. First place the vase in a cool dark area (basement) to encourage root and shoot growth. When the shoots are about 2" tall move the vase to a bright windowsill and watch as it begins its blooming ballet. Periodically change the water and keep the level at the base of the bulb. As the flower stalks grows towards the light, rotate the glass frequently to prevent toppling. Sit back and enjoy!

Care Tip: They are best rooted at cooler temperatures, below 60°F. Once rooted, a somewhat warmer house temperature is preferred. But not too hot or too dry an environment, as it may hinder flowering. Also, the less light they receive, the taller they will grow.

Exposure: Full sun to partial shade

Height: Grows 12-24" tall

USDA Zones: Hardy in USDA zones 8-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
