FLYING FISHERMAN® ACUTINT™ POLARIZED LENS COLORS

SMOKE
Gray tint best for bright, sunny conditions like fishing deep water, lakes and offshore. The most natural lens color that doesn't distort colors.

AMBER
Brown tint that adds contrast. Excellent for shallow water fishing, bright sun and overcast conditions. Enhances visual definition.

YELLOW-AMBER
Great for extremely flat or low light conditions like early morning or evening. Sharpens visual definition and increases contrast.

VERMILLION/COPPER
A high-contrast lens tint favored for sight fishing, muddy water and low light conditions. Maximum sharpness and color definition.

GREEN MIRROR
Amber lens with a multi-layered, green mirror coating that reflects glare away from the eyes. Works well in either bright sun or low light.

BLUE MIRROR
Smoke lens with a multi-layered, blue mirror coating that adds a stylish look and extra glare reflection. Best for bright sunny conditions.

RED/GOLD MIRROR
Amber lens with a multi-layered, gold mirror coating that adds extra glare reflection. Excellent for low light conditions.

SILVER FLASH MIRROR
Smoke or amber lens with a multi-layered, silver mirror coating that adds extra glare reflection. Smoke/Silver is excellent for bright sun, Amber/Silver adds contrast in low light conditions.
