

REDMOND DAILY GOLD

Gut performance

PRODUCT BRIEF

Mother Nature added weathered volcanic ash to seawater, let it age, and formed Redmond's unique deposit of sodium bentonite clay. The layered honeycomb structure, negative charge, and alkalinity are the science behind the binding and buffering capabilities of our Daily Gold products.

- NATURE MADE, UTAH MINED

The rich composition of balanced trace minerals in Daily Gold formed from volcanic ash and seawater. These bioavailable minerals are easily absorbed in the body and support cell function.

- MORE BUFFERING, LESS BURN

Bentonite clay buffers excess acid and protects the stomach lining, reducing the risk of ulcers and inflammation.

- HELP GOOD GUT FLORA THRIVE

Bentonite's buffering ability creates a friendly environment where healthy gut flora can flourish.

- BIND + REMOVE TOXINS

Bentonite attracts and structurally binds to harmful toxins that interrupt gut function and immune health, carrying them all the way out of the system.

- BOOST NUTRIENT ABSORPTION

Removing toxins and promoting healthy gut flora helps your horse's intestinal villi grow, enhancing nutrient absorption and strengthening the immune system.

- PREMIUM DIGESTIVE CARE—AFFORDABLE PRICE

Daily Gold is an effective and affordable digestive supplement that easily fits into any horse owner's budget.

VARIANTS

When/Why choose

Powder vs Pellets

Daily Gold Powder works great for most horses and is the more economical choice.

We designed **Daily Gold Pellets** for picky horses or those not getting grain.

POWDER

Original Powder

PELLETS

Alfalfa-based Pellet
