

# RESCUE™

advanced nutrition when colostrum is unavailable

## FEEDING DIRECTIONS:

Rescue is the first feeding and has its greatest impact when fed within 4 hours of birth. Mix 4 1/2 cups\* (1.1 pounds) of Rescue with 1.5 quarts of warm (105°F/40°C) water. Stir until completely dissolved. Feed to the calf in one feeding via nipple feeder or esophageal feeder as soon as possible following birth.

## STORAGE:

Store at room temperature in a dry place. Use mixed product immediately – do not store.
