

# Water-Plug™

## The solution to manhole overflow

- ◆ Easy to Use, Deploy, Store & Transport
- ◆ Conical shape allows for self deployment
- ◆ Surrounds drain to retain over 2in of water
- ◆ Built in weights surround inner drain to seal and minimize seepage underneath
- ◆ Use sump pump inside unit to pump, drain & divert water
- ◆ Zippered cover contains water to prevent overflow
- ◆ Reusable & lasts for years

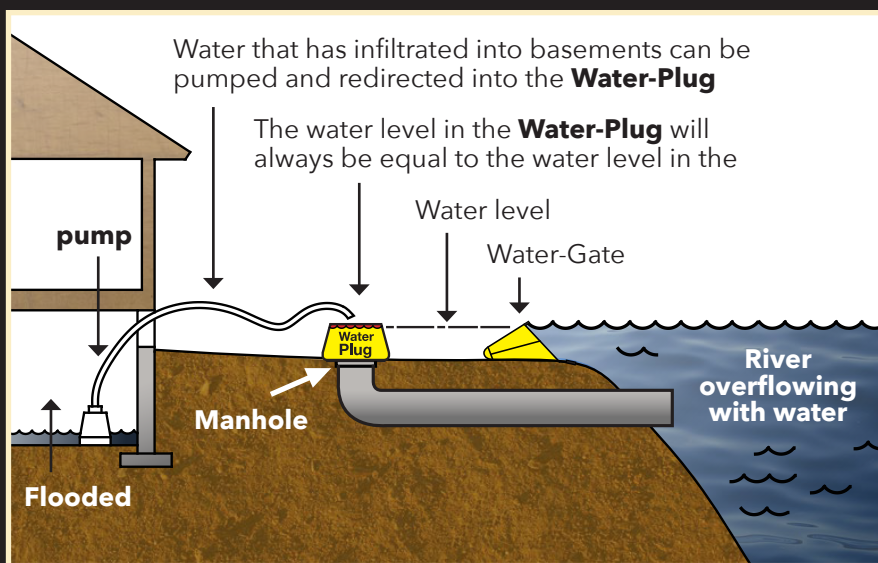

Water-Plug with open top & side cut away for visual purposes.

Retail ◆ Commercial ◆ Industrial ◆ Municipalities  
Rescue ◆ Transportation ◆ Environmental & More

Quick Dam Water-Plugs provide protection against manhole overflow. This self rising barrier wraps around the manhole & contains the water seeping out. Should water start to exceed the product height, simply place a sump pump inside to direct water elsewhere & prevent surrounding damage.

### Multiple Uses:

WATER-PLUG	
Size	Part #
26.5in H x 48in Dia.	QDWGWP
TECHNICAL SPECIFICATIONS	
Water retention height	26in (67cm)
External diameter (bottom)	48in (122cm)
Maximum cesspool diameter	34in (75cm)
