**LILIES SORBET PATIO CONTAINER BLEND**

Lilies are one of the truly great garden plants, as they are beloved by gardeners everywhere. Their beauty, diversity, extended season of bloom, graceful stature and overall reliable disposition reflect the fruits of hundreds of years of selective breeding. In Chinese, the word "Lily" means "forever in love". The liliium family is so large, varied, and complex that it is challenging to describe them in short. Lilies are deer and critter resistant. Plant just about anywhere - borders, beds, cutting gardens, perennial gardens, pots and containers.

---

*Good full sun perennial choice*

*Pre-mixed blend of lilies*

*Will return for years to come*

---

*About This Variety:* While these lilies can be planted just about anywhere and they be fine, we specifically selected this Sorbet Patio Blend specifically for container gardening. The varieties within the blend are complimentary in color, height and blooming time. They are shorter in height and super easy to grow.

*Growing Instructions:* Proper drainage is very important for lilies. While they like moist soil, sopping wet soil will cause the bulbs to rot. Make sure you select a container with drainage holes on the bottom. For extra drainage, add a layer of rocks in the bottom of the pot. This layer of rocks will also help stabilize the pot if you are growing tall lilies, but it will make the pot a little heavy to move around. Select the proper size pot for the amount of lilies you are planting. The bulbs should be planted about 2" apart. Best to plant just a few inches deep. Plant them early spring and put them in a frost free area at first so that they will receive their required cold period, a garage, basement or shed will do. Them moist and watered.

*Care Tip:* As bulbs are essentially storage mechanisms, they already contain everything needed to produce flowers. There is no need to fertilize them. After flowering, remove the root ball from the pot and plant in your garden prior to frost to enjoy blooms next spring.

*Exposure:* Full sun to partial shade

*Height:* Grows 12-18" tall

*Spacing:* Plant 3-4" deep

*Hardy in:* USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
