

SD4X

48" Overhead Fan

The SD4X industrial fan is perfect for medium areas that need huge, even airflow. With a totally-enclosed 1.5 HP HP TEFC motor, it gets the job done, and is built to last a long time. Installation is a breeze, and it is efficient, quiet, and powerful. Hang at least 7' from the floor, and at least 2' from the ceiling. Those summer days get dangerously hot and this industrial fan moves big air to make it tolerable. The SD4X is also available in a variable speed option.

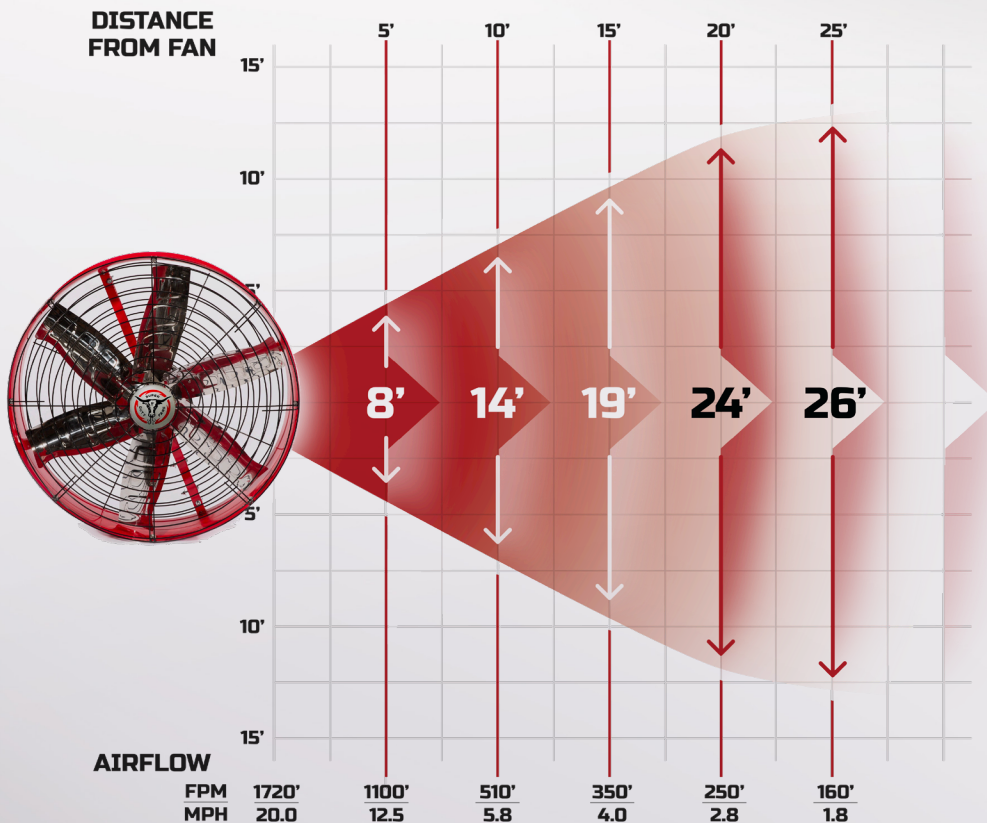

SD4X

SPECIFICATIONS
