The Maxx is built for the job site and able to withstand the toughest conditions. It is new larger size fits heavy duty contractor grade extension cords and accommodates most oversized 30 amp plug heads. The patented sealing system accommodates large 10 gauge cords but automatically adjusts to protect smaller diameter 16 gauge homeowner electrical cord connections. A patented cord strain relief system prevents the extension cord connection from being pulled apart while using or hauling tools.

- **NEW ->** Larger interior cavity fits oversized 30 amp and aftermarket connections
- Perfect for any job site, industrial/commercial applications, plug-in vehicles disaster relief, around the shop and at home
- Available in packs of 2, 3, 4, 5, and 10. Comes in orange, black, green, and red.
- Unique design will keep cord connections dry all season long
- Heavy duty UV resistant commercial grade plastic
- Patented and retail ready

Commercial Applications Job Site Disaster Relief Plug-In Vehicles
